<b>About the project: WHO Technical Support Network for Revised National Tuberculosis Control Programme (WHO-RNTCP TSN)</b>	<p>Ending Tuberculosis (TB) epidemic in India by 2025, five years ahead of the global targets as per sustainable development goals 2030, has been a top priority of Government of India (GoI) leveraging on various GoI initiatives including Digital India. Real-time digital surveillance and monitoring are crucial to achieve this goal. WHO Country Office (WCO) India has been providing high end technical assistance to the Revised National TB Control Programme (RNTCP), GoI through a network of medical consultants since nearly two decades. WCO India has now been requested by Directorate General of Health Services, Ministry of Health &amp; Family Welfare, Government of India, for technical support in setting up a national TB surveillance unit using digital platform as part of the existing technical assistance network. This IT team will provide technical assistance in the development and maintenance of NIKSHAY; a web-based patient notification, tracking, surveillance and monitoring ICT platform of RNTCP; with the purpose of accelerating digitalization of information management as well as enable ICT based service delivery linkages for diagnosis, treatment, logistic management and social protection through a multi-sectoral framework to improve patient care. This will also be linked with proposed Integrated Health Information Platform for overarching, larger health intelligence and surveillance. The national TB surveillance Unit will also provide support to the state teams in capacity building and troubleshooting on ICT front to facilitate universal coverage of TB notification from public and private sectors and monitoring of quality indicators of all service delivery components enlisted above.</p>

	<p>The proposed national TB surveillance unit will function under the overall supervision of WHO TB National Professional Officers (NPOs) and Central TB Division (CTD). All positions are contractual and extendable annually based on performance appraisal. The current project period is 3 years.</p> <p>The deliverables of the national TB surveillance Unit will be:</p> <ul style="list-style-type: none"> <li>• Geospatial analytics</li> <li>• ICT based treatment adherence tools integration</li> <li>• Call Center CRM integration</li> <li>• Machine to Nikshay data transfer capability</li> <li>• DBT monitoring capabilities</li> <li>• Deduplication</li> <li>• Artificial intelligence</li> </ul> <p>The incumbents based on their ToRs will be part of the IT team, will be stationed at CTD, New Delhi and are expected to perform their duties as per the guidance of the supervisors and will be governed by the terms and conditions of the contractual arrangement.</p>
<p><b>Job Description</b></p>	<ul style="list-style-type: none"> <li>• (S)He shall be responsible to assess IT Infrastructure requirements and design a network architecture in concordance with Functional Requirement Specifications</li> <li>• (S)He shall administer and maintain all aspects of IT Infrastructure, virtualization, Back up, Storage, Infra applications, private &amp; public cloud</li> <li>• (S)He shall be responsible for monitoring performance of network systems in order to identify any issues, including on networks, firewalls, servers, operating systems, applications and devices.</li> <li>• (S)He shall be responsible for technical configuration and maintenance of the server where the application will be hosted</li> <li>• (S)He shall work closely with the team to implement the necessary upgrades, patches or troubleshooting to solve the problem.</li> <li>• Troubleshoot and optimize performance on server</li> <li>• (S)He shall proactively communicate upcoming infrastructure changes to management, and work with the team to smooth transitions and decrease any negative impact on business</li> </ul>
